

I. POPULATION AND VITAL STATISTICS

A. POPULATION

In the year 2000 the United States Census Bureau conducted its ten-year census count of the United States resident population. The results of this count are being released in stages by the Census Bureau, with the most recent data being Summary File 2 that provides state level data by race groups, individual years of age and sex. According to the 2000 census count, Louisiana's resident population was 4,468,976 as of April 1, 2001.

The state's subgroup census counts for 2000 are given in the following table.

Comparison of the year 2000 national and state population census counts show that Louisiana and the United States have very similar age distributions. Relative to the country as a whole Louisiana has a larger percentage of population aged 5-19, but a smaller percentage of population aged 20-44.

Estimates of the population distribution by race, however, show the percentage of blacks in Louisiana is more than twice the national average. Blacks comprise 32.5% of the state's population, versus 12.3% nationally. Individual parishes in Louisiana range from 5% to 67% black.
